ATTENTION HARRISVILLE AND PASCOAG WATER CUSTOMERS

The Harrisville Water Department is issuing this notice that the water ban has been lifted effective September 14, 2010.

We all share in the benefits of the world's safest, purest drinking water. By making simple changes in our daily routines, we can all contribute to protecting this resource for future generations.

What local residents can do?

- Water your lawn early in the morning or at night to avoid excessive evaporation. Do not over-water your lawn.
- Fully load the dishwasher and clothes washer before running.
- Defrost frozen food in the refrigerator or in the microwave instead of running hot water over the food.
- When washing dishes by hand, do not let the water run.
- Use a broom, rather than a hose, to clean sidewalks and driveways.
- If you have a swimming pool, use a cover. You will cut the loss of water by evaporation by 90 percent.
- Repair dripping faucets and leaky toilets. Dripping faucets can waste up to 2,000 gallons of water each year in the average home. Leaky toilets can waste as much as 200 gallons per day.
- Do not leave the water running while you brush your teeth.

It is incumbent upon us all to protect this valuable natural resource. By taking these simple steps, we can all feel confident that we are doing our part.

Thank you for your co-operation during this emergency water ban.

Paul R Bisson
